

Pf-2894/ncc/us/mh

What is claimed is :

1. A communication system including :

a communication network ; and

5 a plurality of terminal device connectable to said communication network for transmitting and receiving an information through said communication network ;

wherein said communication system includes at least a table which provides at least a retrieval condition and at least a corresponding display method to said at least retrieval condition, so as to enable said terminal device to perform a retrieval to said information under said at least retrieval condition and to display said information in accordance with said at least corresponding display method.

15 2. The communication system as claimed in claim 1, wherein said table comprises a key table which defines at least a key object and at least a corresponding display method to said key object.

20 3. The communication system as claimed in claim 2, wherein said at least key object comprise at least one of selected from the group consisting of key words and key marks.

4. The communication system as claimed in claim 1, wherein said table includes designating data which designate necessary data for

09983041.102201

Pf-2894/nec/us/mh

displaying said information in accordance with said at least corresponding display method.

5. The communication system as claimed in claim 1, wherein said table includes necessary data for displaying said information in accordance with said at least corresponding display method.

6. The communication system as claimed in claim 1, wherein said table is editable.

7. The communication system as claimed in claim 1, wherein said table is transferable through said communication network.

8. The communication system as claimed in claim 1, wherein said information comprises an e-mail.

9. The communication system as claimed in claim 8, wherein said e-mail has at least an attached file.

10. The communication system as claimed in claim 1, wherein said table is stored in a memory of said terminal device.

11. The communication system as claimed in claim 1, wherein said table is open on a server computer on said communication network, so as to

enable said terminal device to download said table from said server.

a first function block for performing said retrieval under said retrieval condition with reference to said table ; and

13. The communication system as claimed in claim 12, wherein said terminal device further includes :

14. The communication system as claimed in claim 1, wherein said terminal device includes :

a memory accessible by said processing unit, and said memory storing a computer program comprising the steps of :

displaying said information in accordance with said at least corresponding display method.

Pf-2894/ncc/us/mh

15. The communication system as claimed in claim 14, wherein said computer program further comprising the step of transmitting and receiving said table through said communication network.

5 16. A terminal device connectable to a communication network, said terminal device comprising :

a processing unit ;

a communication unit electrically coupled to said processing unit for transmitting and receiving an information ;

10 a display unit electrically coupled to said processing unit for displaying said information ;

an operation unit electrically coupled to said processing unit for operating said terminal device ; and

15 a memory unit electrically coupled to said processing unit for storing at least a table which provides at least a retrieval condition and at least a corresponding display method to said at least retrieval condition, so as to enable said terminal device to perform a retrieval to said information under said at least retrieval condition and to display said information in accordance with said at least corresponding display method.

20

17. The terminal device as claimed in claim 16, wherein said table comprises a key table which defines at least a key object and at least a corresponding display method to said key object.

Pf-2894/nec/us/mh

18. The terminal device as claimed in claim 17, wherein said at least key object comprise at least one of selected from the group consisting of key words and key marks.

5 19. The terminal device as claimed in claim 16, wherein said table includes designating data which designate necessary data for displaying said information in accordance with said at least corresponding display method.

10 20. The terminal device as claimed in claim 16, wherein said table includes necessary data for displaying said information in accordance with said at least corresponding display method.

15 21. The terminal device as claimed in claim 16, wherein said table is editable.

20 22. The terminal device as claimed in claim 16, wherein said table is transferable from said communication unit through said communication network.

23. The terminal device as claimed in claim 16, wherein said information comprises an e-mail.

24. The terminal device as claimed in claim 23, wherein said e-mail

Pf-2894/nec/us/mh

has at least an attached file.

25. The terminal device as claimed in claim 16, wherein said terminal device includes :

5 a first function block for performing said retrieval under said retrieval condition with reference to said table ; and

a second function block for displaying said information in accordance with said at least corresponding display method.

10 26. The terminal device as claimed in claim 25, wherein said terminal device further includes :

a third function block for transmitting and receiving said table through said communication network.

15 27. The terminal device as claimed in claim 16, wherein said memory stores a computer program comprising the steps of :

performing said retrieval under said retrieval condition with reference to said table ; and

20 displaying said information in accordance with said at least corresponding display method.

28. The terminal device as claimed in claim 27, wherein said computer program further comprising the step of transmitting and receiving said table through said communication network.

00993041 102201

Pf-2894/nec/us/mh

29. A terminal device connectable to a communication network, said terminal device includes :

5 a first function block for performing a retrieval to an information under at least a retrieval condition ; and

a second function block for displaying said information in accordance with at least a corresponding display method to said at least a retrieval condition.

10 30. The terminal device as claimed in claim 29, wherein said at least retrieval condition and said at least corresponding display method are recorded on a table.

15 31. The terminal device as claimed in claim 30, wherein said table comprises a key table which defines at least a key object and at least a corresponding display method to said key object.

20 32. The terminal device as claimed in claim 30, wherein said table includes designating data which designate necessary data for displaying said information in accordance with said at least corresponding display method.

33. The terminal device as claimed in claim 30, wherein said table includes necessary data for displaying said information in accordance with

Pf-2894/nec/us/mh

said at least corresponding display method.

34. The terminal device as claimed in claim 30, wherein said table is editable.

5

35. The terminal device as claimed in claim 30, wherein said table is transferable from said communication unit through said communication network.

10 36. The terminal device as claimed in claim 30, wherein said information comprises an e-mail.

37. The terminal device as claimed in claim 36, wherein said e-mail has at least an attached file.

15

38. A method of displaying an information, comprising the steps of :
performing a retrieval to an information under at least a retrieval condition ; and

20 displaying said information in accordance with at least a corresponding display method to said at least a retrieval condition.

39. The method as claimed in claim 38, wherein said retrieval is performed with reference to at least a table which provides at least a retrieval condition and at least a corresponding display method to said at

Pf-2894/nec/us/mh

least retrieval condition, and said information is displayed in accordance with said at least corresponding display method.

40. The method as claimed in claim 39, wherein said table comprises a key table which defines at least a key object and at least a corresponding display method to said key object.

41. The method as claimed in claim 40, wherein said at least key object comprise at least one of selected from the group consisting of key words and key marks.

42. The method as claimed in claim 39, wherein said table includes designating data which designate necessary data for displaying said information in accordance with said at least corresponding display method.

44. The method as claimed in claim 43, further comprising the step of : reading out said necessary data in accordance with said designating data before displaying said information.

45. The method as claimed in claim 39, wherein said table includes necessary data for displaying said information in accordance with said at least corresponding display method.

46. The method as claimed in claim 39, wherein said information

Pf-2894/nec/us/mh

comprises an e-mail.

47. The method as claimed in claim 46, wherein said e-mail has at least an attached file.

5

48. A computer program of displaying an information, said computer program comprising :

performing a retrieval to an information under at least a retrieval condition ; and

10

displaying said information in accordance with at least a corresponding display method to said at least a retrieval condition.

15

49. The computer program as claimed in claim 48, wherein said retrieval is performed with reference to at least a table which provides at least a retrieval condition and at least a corresponding display method to said at least retrieval condition, and said information is displayed in accordance with said at least corresponding display method.

20

50. The computer program as claimed in claim 49, wherein said table comprises a key table which defines at least a key object and at least a corresponding display method to said key object.

51. The computer program as claimed in claim 50, wherein said at least key object comprise at least one of selected from the group consisting

Pf-2894/ncc/us/mh

of key words and key marks.

52. The computer program as claimed in claim 49, wherein said table includes designating data which designate necessary data for displaying
5 said information in accordance with said at least corresponding display method.

54. The computer program as claimed in claim 53, further comprising the step of : reading out said necessary data in accordance with
10 said designating data before displaying said information.

55. The computer program as claimed in claim 49, wherein said table includes necessary data for displaying said information in accordance with said at least corresponding display method.
15

56. The computer program as claimed in claim 49, wherein said information comprises an e-mail.

57. The computer program as claimed in claim 56, wherein said e-
20 mail has at least an attached file.
